Filming Frequently Asked Questions

<http://www.austintexas.gov/page/special-events-policies-procedures#film>

The events office will make every effort to review and approve filming uses when an application is received. While the department strives to review and approve all requests, deference is first given to maintain park user access and ensuring minimal to NO public impact.

In order to be most successful, thoroughly detailed applications should be received **7 or more days** in advance of the requested start date. Shoots with multiple locations, detailed needs, or large numbers of cast/crew should plan to submit requests a minimum of **14 days or more in advance of the start date**. Applications are processed in the order received, and may be approved based upon the current overall permit workload and resources available. ***Applications that are incomplete or have conflicting information, may require a new application, which could cause delays in the approval process!***

Be sure to check your application before submittal!!!
